GENERAL ENGLISH COURSES

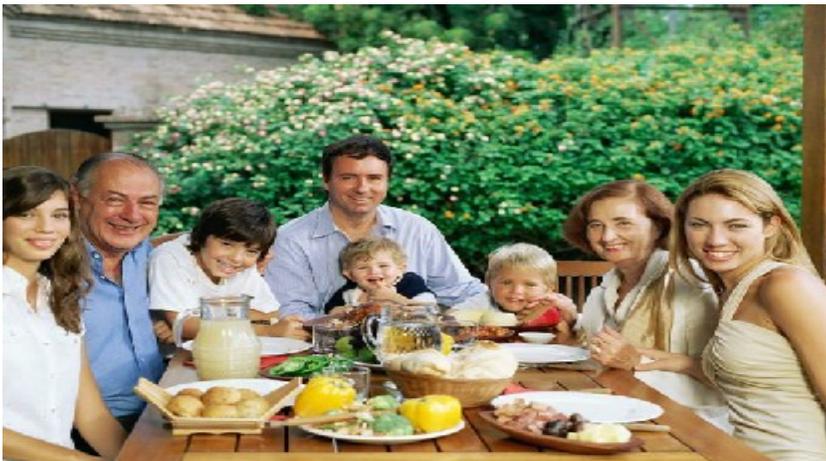

GENERAL ENGLISH LANGUAGE COURSES

As with all our courses, you choose how many weeks you wish to study, the number of hours and how to want to study. You can be taught individually 1:1, in a pair 2:1 or in a small group, the choice is yours. The General English course is ideal if you wish to improve your English all round and make progress with your fluency. It is also a wonderful opportunity to experience a new environment, culture and language.

The programme of lessons, which are generally run in the morning will incorporate a range of skills including reading, writing, listening and speaking. Grammar, vocabulary, pronunciation will also be covered as well as culture and topics that are of interest to you.

If you require more emphasis on certain skills then the teacher will adapt the course to suit your needs. A complete needs analysis and assessment will be carried out at the very beginning of the course and a study plan will be created.

Further to your initial needs analysis the teacher will continually liaise with you to find out whether you are satisfied with your programme.
